Autodesk® AutoCAD® software continues to lead the CAD industry and become a critical part of the workflows of designers and engineers around the world. The robust drawing and modeling capabilities in AutoCAD allow users to create stunning designs that can help advance the state-of-the-art in virtually every industry.

AutoCAD remains the best, most powerful, professional, and free 2D and 3D CAD application on the market. The 2020 release of AutoCAD brings exciting new features to the table, including: Over 500 new features. Rapid feedback. More integrated cloud services. Now with AutoCAD on iPad. Autodesk is committed to offering the best AutoCAD experience and maintaining the software's high quality. The 2020 release of AutoCAD is the result of an extensive development cycle that began more than three years ago. During this time, a dedicated team of developers dedicated to AutoCAD has been hard at work making the software even better. In the process, AutoCAD has evolved into a sophisticated design and modeling platform that enables you to create more professional, connected, and collaborative designs with a much richer user experience. A new draft window, UI, and a revised ribbon are just a few examples of changes in this release. As part of the 2020

release, the Autodesk team has put together a video highlighting several of these new features: You can download the 2020 release of AutoCAD here: The AutoCAD 2020 release is available now to qualifying customers on the Autodesk App Store and on Autodesk.com.
